Introduction

Applications

- Sony DDM ATC Display Replacement
- Air Traffic Management (ATM)
- Air Traffic Control (ATC)
- Vessel Traffic Management (VTM)
- Command and Control (C³)
- VGA and DVI Inputs for new systems

Specifications

Display	
Active area	503.808mm x 503.808mm (19.83" x 19.83")
Native resolution	2048 x 2048
Pixel pitch	0.246mm (0.082 X RGB)
Colors	16,777,216 (256 gray levels)
Contrast ratio	450:1 (Typical, at 25°C)
Luminance	225 cd/m ² (typical, at 25°C)
Luminance variation	10% (MAX, AT 25°C)
Viewing angle, H	± 85° (typical, for CR ≥ 10)
Viewing angle, V	± 85° (typical, for CR ≥ 10)
CIE white	X = 0.313, Y = 0.329 (Typical, at 25°C)
CIE red	X = 0.607, Y = 0.339 (typical at 25°C)
CIE green	X = 0.287, Y = 0.597 (typical at 25°C)
CIE blue	X = 0.145, Y = 0.087 (typical at 25°C)

Response time	$t_r = 5\text{msec}$, $t_f = 20\text{msec}$ (Typical, at 25°C)
Analog Bandwidth	360MHz
Backlight	
Type	18 CCFL
Lifetime	50,000 hrs to 60% of maximum brightness (Typical, at 25°C)
Electromagnetic Environment	
Susceptibility	Per EN55022
Emissions	Per EN55022, FCC class A
Safety	
Design	Per UL/C 1950, EN60950
Physical Environment	
Temperature (operating)	0°C to +40°C
Temperature (storage)	-20°C to +60°C
Relative Humidity (operating)	85%, non-condensing (To 40°C)
Relative Humidity (storage)	85%, non-condensing (To 55°C)
Altitude (operating)	Sea level to 15,000ft (4500m)
Altitude (storage)	Sea level to 40,000ft (12000m)
Shock (operating)	20g, 11msec ½ sine
Shock (storage)	20g, 11msec ½ sine
Vibration (operating)	±1mm, 2 to 13Hz; 0.7g, 13 to 100Hz, 3 axes
Vibration (storage)	0.7g 2 to 13 Hz; 1.0g 14 to 500 Hz
Weight (in standard configuration):	46lbs. (20.9Kg)
Power (in standard configuration)	85 to 264VAC, 50/60Hz*, 165W, PF corrected. *(400Hz operation possible with increased ground leakage current)

Inputs	
Video signal input	RGB digital (DVI and TMDS) or RGB analog (5BNC and DVI)
Sync signal input	Separate TTL H&V, Composite TTL H&V, Sync on green
Sync selection	Automatic
Signal connector	<ul style="list-style-type: none"> • 5 BNC -- with 50Ω RGB and 75Ω H&V • Analog input on DVI-I connector • 2 Dual Link DVI inputs on DVI-I connectors

INSTALLATION

General

This section describes the installation of the monitor. The monitor is pre-aligned at the factory to user input requirements. However, there may still be the need for some minor adjustments to be made. Those procedures will be provided later in the Calibration Procedures section.

Unpacking

Before unpacking, the carton should be inspected for shipping damage. Open the carton carefully and remove the monitor. Carefully inspect the monitor for shipping damage. If damage has occurred, save the shipping carton and all packing materials for possible inspection. Notify the shipping company and EDL Displays at this time.

Mounting

The Model 30281 is available in Desktop, Panel Mount and VESA Mount versions.

Desktop

The Model 30281 DT is provided with a sturdy desk stand and yoke assembly. This may be used as a moveable stand-alone configuration. The rubber feet may be removed from the base and permanently attached to a sturdy mounting surface. The yoke assembly may be removed from the stand and attached to a customer-supplied structure.

Panel Mount

The Model 30281 PM is intended for custom installations. It may be mounted from the front of an opening in the customers console or from the rear. Referring to figure 2 there are four 0.25-inch (6mm) mounting holes provided. If these holes are not appropriate, additional holes may be drilled without compromising the integrity of the structure. Care should be taken to assure no shavings fall into the display assembly.

The panel mount version may be supplied with front panel OSD buttons, a wired remote controls box, or an infrared hand-held remote control. The choice will depend on the desired installation configuration.

VESA Mount

The Model 30281 VM is similar to the Desktop unit, but is provided with a reinforced rear mounting plate designed to accept a standard VESA mount support, in lieu of the desk stand. This VESA mounting plate is configured with 4-6mm x 1.0 threaded holes on a 200mm x 200mm square pattern.

SIGNAL INPUT CONNECTIONS

The Model 30281 LCD Monitor accepts the following input types:

- Analog input via 5 BNC connectors
- Analog input on one DVI-I connector
- Digital input on each of two DVI connectors

Provided the correct cable is used, the monitor will automatically sense and adapt to any analog or digital signals applied. In the case of analog signals on the BNC input, the monitor will automatically sense and adapt to the sync type (sync-on-green, composite separate sync, or separate horizontal and vertical syncs).

Video Input Connector Pin Assignments (DVI-I connector)

Pin	Signal	Pin	Signal
1	TMDS Data 2 -	16	Hot Plug Detect
2	TMDS Data 2 +	17	TMDS Data 0 -
3	TMDS Data 2/4 Shield	18	TMDS Data 0 +
4	TMDS Data 4 -	19	TMDS Data 0/5 Shield
5	TMDS Data 4 +	20	TMDS Data 5 -
6	DDC Clock	21	TMDS Data 5 +

7	DDC Data	22	TMDS Clock Shield
8	Analog Vertical Sync	23	TMDS Clock +
9	TMDS Data 1 -	24	TMDS Clock -
10	TMDS Data 1 +	C1	Analog Red
11	TMDS Data 1/3 Shield	C2	Analog Green
12	TMDS Data 3 -	C3	Analog Blue
13	TMDS Data 3 +	C4	Analog Horizontal Sync (or composite H & V sync)
14	+5VDC (power input)	C5	Analog Ground (RGB return)
15	Ground (5VDC, and analog H and V sync return)		

Cable Options

DVI-I to DVI-D

This cable should be used when connecting the monitor to a signal source that provides digital outputs by way of a DVI-D connector.

DVI-D (output)	Signal	DVI-I (input)
1	TMDS Data 2 -	1
2	TMDS Data 2 +	2
3	TMDS Data 2/4 Shield	3
4	TMDS Data 4 -	4
5	TMDS Data 4 +	5
6	DDC Clock	6
7	DDC Data	7
8	Not connected	8
9	TMDS Data 1 -	9
10	TMDS Data 1 +	10
11	TMDS Data 1/3 Shield	11
12	TMDS Data 3 -	12
13	TMDS Data 3 +	13
14	+5VDC (power input)	14
15	Ground (5VDC, and analog H and V sync return)	15
16	Hot Plug Detect	16
17	TMDS Data 0 -	17
18	TMDS Data 0 +	18
19	TMDS Data 0/5 Shield	19
20	TMDS Data 5 -	20
21	TMDS Data 5 +	21
22	TMDS Clock Shield	22
23	TMDS Clock +	23
24	TMDS Clock -	24

DVI-I to 5 BNC

This cable should be used when connecting the monitor to an analog source that provides RGB video and separate horizontal and vertical sync by way of 5 BNC connectors.

Source (output)	Signal	DVI-I (input)
BNC R	Analog Red	C1
BNC G	Analog Green	C2
BNC B	Analog Blue	C3
BNC H/C	Horizontal Sync	C4
BNC V	Vertical Sync	8
(BNC RGB shells)	Analog RGB Ground	C5
(BNC H/C and V shells)	Sync Ground	15

DVI-I to HD-15

This cable should be used when connecting the monitor to an analog source that provides RGB video and separate horizontal and vertical sync by way of a VGA style HD-15 connector.

Source HD-15 (output)	Signal	DVI-I (input)
1	Analog Red	C1
2	Analog Green	C2
3	Analog Blue	C3
13	Horizontal Sync	C4
14	Vertical Sync	8
6, 7, 8	Analog RGB Grounds	C5
10	Sync Ground	15

5 BNC to 5 BNC

This cable should be used when connecting the monitor to an analog source that provides RGB video and separate horizontal and vertical sync by way of 5 BNC connectors with 50Ω video outputs.

Source (output)	Signal	BNC (input)
BNC R 50Ω	Analog Red	BNC R
BNC G 50Ω	Analog Green	BNC G
BNC B 50Ω	Analog Blue	BNC B
BNC H/C 75Ω	Horizontal Sync	BNC H/C
BNC V 75Ω	Vertical Sync	BNC V

Operation

Graphical User Interface and On-Screen Display

The 30281 has an integrated On-Screen Display (OSD) that is used to control various display and system parameters. The OSD can be controlled by the front keypad, by an available wired remote, or by an available infrared (IR) remote controller.

Figure 4 Front Panel Controls

Figure 5 IR Remote

Keys:

AUTO	Press to perform an automatic adjustment procedure. Only applicable for analog RGB source modes.
SOURCE	1 st button press displays the current source. 2 nd button press searches for the next available input source in the following order: <ol style="list-style-type: none">1. Digital RGB 1 (DVI-I Connector J8)2. Digital RGB 2 (DVI-D Connector J7)3. Analog RGB 1 (5 BNC Connectors)4. Analog RGB 2 (DVI-I Connector J8) After Analog RGB 2 the cycle starts over at Digital RGB.
Note: When either the Main Menu or Quick Menu is activated, the SOURCE button acts like the EXIT button to exit the menu or to move up a level.	
MENU	Press to enter the Main Menus or move down to a submenu in the Main Menu.
EXIT	Leave the menu or move up a level out of a submenu. (IR only – use the SOURCE button to perform this function on the keypad)
UP	Navigate the menu functions
DOWN	Navigate the menu functions
LEFT	Navigate the menu functions and select displays settings
RIGHT	Navigate the menus function and select display settings

Main Menu

If the MENU button is pressed while no OSD is active, the Main Menu will be activated. The Main Menu consists of 3 submenus: PICTURE, OSD and UTILITY. Use the LEFT or RIGHT buttons on either the IR remote controller or the keypad to select the submenu. The DOWN or MENU button will enter the selected submenu.

Picture Submenu

The PICTURE submenu contains different functions depending on the current source selection. If the current source is Digital RGB or Analog RGB, then the PICTURE submenu contains the following functions:

- BRIGHTNESS
- CONTRAST
- PHASE
- FREQUENCY
- H POSITION
- V POSITION
- SHARPNESS

When the selects source is either of Composite or S-Video, the PICTURE functions are:

- BRIGHTNESS
- CONTRAST
- HUE
- SATURATION
- SHARPNESS

Use the UP or DOWN button to select the desired function. Use the LEFT or RIGHT button to set the value of the selected function.

OSD Submenu

The OSD submenu contains the following functions:

- H POS
- V POS
- OSD TIMEOUT
- LANGUAGE

Use the UP or DOWN button to select the desired function. Use the LEFT or RIGHT button to set the value of the selected function.

Utility Submenu

The UTILITY submenu contains the following functions:

- FREEZE FRAME
- RESET
- COLOR TEMPERATURE
- INFO

Use the UP or DOWN button to select the desired function. Use the LEFT or RUGHT button to set the value of the selected function.

Quick Menu

If any of the direction buttons are pressed while no OSD is active, the Quick Menu will be activated. The Quick Menu consists of 4 functions:

- BRIGHTNESS
- CONTRAST
- PIP MODE
- SCALING MODE

The UP or DOWN button will scroll through the Quick Menu to select a function. Use the LEFT or RIGHT buttons to adjust or change the value of the selected function. EXIT or SOURCE will exit the Quick Menu.

Standby Mode

The display can be placed in a low-power standby mode in which the backlight is extinguished, by depressing and holding the SOURCE button for at least 3 seconds before releasing. Normal operation can be restored by momentarily pressing SOURCE again.

Recommended Use

Safety Precautions and Maintenance

- There are no user controls or adjustments inside the monitor. Refer to the applicable EDL Displays Maintenance Manual for detailed instructions for module replacement procedures. Refer all servicing to qualified service personnel.
- Do not spill any liquids into the cabinet or use your monitor near water.
- Do not insert objects of any kind into the cabinet slots, as they may touch dangerous voltage points, which can be harmful or fatal or may cause electric shock, fire or equipment failure.
- Do not place any heavy objects on the power cord. Damage to the cord may cause shock or fire.
- Do not place this product on a sloping or unstable cart, stand or table, as the monitor may fall, causing personal injury and/or serious damage to the monitor.
- The power cable connector is the primary means of detaching the system from the power supply. The monitor should be installed close to a power outlet that is easily accessible.
- The CCF fluorescent tubes located within the LCD monitor contain mercury. When replacing Backlight Trays, **AVOID**

BREAKAGE of the CCF tubes. Carefully package the used Backlight Tray assembly and return to the vendor, or dispose of the assembly according to the bylaws or rules of your local municipality.

Immediately unplug your monitor from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- When the power supply cord or plug is damaged.
 - If liquid has been spilled or objects have fallen into the monitor.
 - If the monitor has been exposed to rain or water.
 - If the monitor has been dropped or the cabinet is damaged.
 - If the monitor does not operate normally by following operating instructions.
-
- Allow adequate ventilation around the monitor so that heat can properly dissipate. Do not block ventilated openings or place the monitor near a radiator or other heat sources. Do not put anything on top of monitor.
 - Handle with care when transporting. Save packaging for transporting.
 - For optimum performance, allow 20 minutes for warm-up.
 - Adjust the monitor height so that the top of the screen is at or slightly below eye level. Your eyes should look slightly downward when viewing the middle of the screen.
 - Position your monitor no closer than 16 inches and no further away than 228 inches from your eyes. The optimal distance is 24 inches for 30281.
 - Rest your eyes periodically by focusing on an object at least 20 feet away. Blink often.
 - Position the monitor at a 90° angle to windows and other light sources to minimize glare and reflections. Adjust the monitor tilt so that ceiling lights do not reflect on your screen.
 - If reflected light makes it hard for you to see your screen, use an anti-glare filter.
 - Clean the LCD monitor surface with a lint-free, non-abrasive cloth. Avoid using any cleaning solution or glass cleaner!
 - Adjust the monitor's brightness and contrast controls to enhance readability.
 - Use a document holder placed close to the screen.
 - Position whatever you are looking at most of the time (the screen or reference material) directly in front of you to minimize turning your head while you are typing.

- Avoid displaying fixed patterns on the monitor for long periods of time to avoid image persistence (after-image effects).
- Get regular eye checkups.

Ergonomics

- Adjust the brightness for optimum viewability.
- Use the AUTO calibration for optimum set up with most signals.
- Select or set up the desired color temperature.
- Do not use primary color blue on a dark background, as it is difficult to see and may produce eye fatigue and insufficient contrast.

	Warning	
<p>To prevent fire or shock hazards, do not expose this unit to rain or moisture. Also, do not use this unit's polarized plug with an extension cord receptacle or other outlets unless the prongs can be fully inserted.</p> <p>Refrain from applying power with the cabinet opened, as there are high voltage components inside. Refer servicing to qualified service personnel.</p>		

	CAUTION	
<p>To reduce the risk of electric shock, make sure power cord is unplugged from wall socket. To fully disengage the power to the unit, please disconnect the power cord from the AC outlet.</p> <p>Refer servicing to qualified service personnel.</p>
